

1. Color control of t-shirts packed in transparent plastic film

The color of t-shirts packed in a transparent plastic film should be controlled. For this purpose a color sensor type **SPECTRO-3-30-POL** will be used. The distance of the sensor to the object is approximately 80mm and the angle to the vertical axis is around 30°. The color of the t-shirts can be proper detected as shown in the screen shots.
