

1. Control of the presence of the spatula in a pharmaceutical box

The presence of a fluorescent spatula in a pharmaceutical box should be checked.

During the tests the front side is open. At this a **SPECTRO-3-FIO-UV** in connection with an external UV light source type **ELS-UV-1P** an optical fiber type **R-S-R2.1-(6x1)-1200-Y-22°/67°-UV** and an optical front end type **KL-8-R2.1**. As shown in the screen shots, a proper detection of the spatula is possible.
