

1. Differentiation of black and gray velvet at a sensor distance of 100mm

Black and gray interior parts with a velvet casing should be color differentiated at a distance of 100mm. For this purpose a color sensor type **SPECTRO-3-100-COF-d6.0-CL** is used. The spot size at this distance is approximately 6mm. The components can be proper distinguished as shown in the screen shots.
