

### 1. Color measurement sensor SPECTRO-3-28-45°/0°-MSM-ANA-...

The color measurement sensor **SPECTRO-3-28-45°/0°-MSM-ANA-VIS** comes with blue and special filtered white LEDs to come close to the D65 light distribution in the visible range. The **SPECTRO-3-28-45°/0°-MSM-ANA-VISUV**, however, is additionally equipped with UV-LEDs, thus, the sensor can cover the whole D65 range. Both sensors are working at a distance of 28mm to the object and deliver excellent values even on shiny objects.
