

1. Color-gloss sensor with two lightning sources: SPECTRO-3-85-FCL-30°/30°

The color-gloss sensor **SPECTRO-3-FCL-85-30°/30°** is equipped with two lightning sources. The lightning unit will be controlled by the color-gloss sensor (power as well as modulated / none modulated) and the changeover from lighting to backlighting will be done from e.g. a PLC. The recommended distance from the sensor to the object is 85mm.
