

### 1. Color sensors with M12 – 8 pin connector and three analog outputs: SLA series

The sensors **SPECTRO-3-DIL-SLA**, **SPECTRO-3-FCL-SLA**, **SPECTRO-3-POL-SLA** and **SPECTRO-3-UV-SLA** come with an M12 8-pin connector and three analog outputs. At this, the analog outputs can be parameterized as voltage outputs (0V ... +10V) or current outputs (4mA ... 20mA). Furthermore, via the serial interface, a baud rate of 460kBaud is meanwhile available. With the windows® - software SPECTRO3-SLA-Scope V1.0 the sensors can be proper adjusted as well as monitored.
