

1. Color sensor with 8-pin M12 connector, five digital outputs, a digital input and an optical fiber connector for plastic fibers:
SPECTRO-3-POF-SLE

The color sensor **SPECTRO-3-POF-SLE** comes with an 8-pin M12 connector, five digital outputs and a digital input. Furthermore, the sensor can be connected to standard plastic fibers with an outer diameter of 2.2mm, thus a huge program of optical front ends is available.
