

1. Optical frontend KL-M12-XL-30°/30-A2.0

The optical frontend **KL-M12-XL-30°/30-A2.0** is used in connection with an optical fiber type **D-S-A2.0-(2.5)-1200-67°** and a standard SPECTRO-3-FIO-... color sensor. The distance to the object is around 30mm and the spot size at this distance is approximately 2mm in diameter. Especially the chromatic reflectivity of hologram films will be controlled with this type.
