

### 1. Color fluorescence sensor SPECTRO-3-500-COF-10x10-UV-ANA

The color fluorescence sensor type **SPECTRO-3-500-COF-10x10-UV-ANA** comes with a spot size of around 10mm x 10mm at a sensor distance of 500mm. The UV light spot will be converted into the visible range in case of the presence of a fluorescent color. The minimal detecting distance is approximately 50mm and the sensor is able to detect even at a distance of 1m.
