

1. Laser through beam line scan sensor type L-LAS-TB-6-T/R-CL

The laser through beam line scan sensor comes with a detecting range at the receiver **L-LAS-TB-6-R-CL** of approximately 6mm. The laser light curtain generated from the transmitter **L-LAS-TB-6-T-CL** comes with a height of around 8mm and a width of 2mm. The maximum transmitter/receiver distance is roughly 5m and the resolution of the system is 2 μ m.
