

1. Laser through beam line scan sensors type L-LAS-TB-F-16x1-100/100-CL

The laser through beam line scan sensor type **L-LAS-TB-F-16x1-100/100-CL** comes with a laser light curtain of approximately 18mm x 2mm. At this, the detecting range at the receiver side is 16mm and the resolution of the system around 8µm. Furthermore the sensor system is a laser class 1 system.
