

1. Contrast sensor SPECTRO-1-SLU-IR and side light unit SI-SLU-IR-16 and SI-SLU-IR-DIF-16

The contrast sensor type **SPECTRO-1-SLU-IR** can be used in connection with the clear glass side light unit type **SI-SLU-IR-16** or with the diffuse glass unit type **SI-SLU-IR-DIF-16**. The SLU units transmit at 860nm, thus the system can be used even for turbidity control.
