

1. Color sensor SPECTRO-3-SLU-SA-ANA in connection with an external light source SI-SLU-16

The color sensor type **SPECTRO-3-SLU-SA-ANA** comes with an external light source type **SI-SLU-16**. This system will be used, if on the one hand a bright light source is necessary, e.g. for high light absorbing objects and on the other hand a small detecting range is required. The aperture of the receiver has a diameter of approximately 7mm.
